

Ministry of Water, Land and Resource Stewardship

ENDED - High Streamflow Advisory - Coldwater River, Similkameen River, and Skagit River
Issued: 10:45 AM March 22, 2026

The River Forecast Centre is **ending** a **High Streamflow Advisory** for:

- Coldwater River and surrounding areas
- Similkameen River and tributaries including upstream Tulameen River
- Skagit River and surrounding areas

River Conditions:

Rivers continue to recede from elevated rainfall and snowmelt runoff over the past week. Flows in some systems may remain elevated but are expected to continue to ease through the week.

The [River Forecast Centre](#) continues to monitor the conditions and will provide updates as conditions warrant.

For information on how to prepare for flood hazards, visit [PreparedBC](#).

BC River Forecast Centre

Ministry of Water, Land and Resource Stewardship

A **High Streamflow Advisory** means that river levels are rising or expected to rise rapidly, but that no major flooding is expected. Fast-flowing bodies of water increase risk to life safety. Minor flooding in low-lying areas is possible.

A **Flood Watch** means that river levels are rising and will approach or may exceed bankfull. Flooding of areas adjacent to affected rivers may occur.

A **Flood Warning** means that river levels have exceeded bankfull or will exceed bankfull imminently, and that flooding of areas adjacent to the rivers affected will result.
