

Ministry of Water, Land and Resource Stewardship

ENDED - Flood Warning – Similkameen (Princeton and upstream), Tulameen

Issued: 9:00AM December 12, 2025

The River Forecast Centre is **ending** the Flood Warning for:

- Similkameen River tributaries including headwater tributaries at and upstream of Princeton
- Tulameen River

Rainfall has eased through the region. Rivers have reached peak levels and have now receded. No significant additional rises are anticipated at this time.

The [River Forecast Centre](#) continues to monitor the conditions and will provide updates as conditions warrant.

For information on how to prepare for flood hazards, visit [PreparedBC](#).

BC River Forecast Centre

Ministry of Water, Land and Resource Stewardship

A **High Streamflow Advisory** means that river levels are rising or expected to rise rapidly, but that no major flooding is expected. Fast-flowing bodies of water increase risk to life safety. Minor flooding in low-lying areas is possible.

A **Flood Watch** means that river levels are rising and will approach or may exceed bankfull. Flooding of areas adjacent to affected rivers may occur.

A **Flood Warning** means that river levels have exceeded bankfull or will exceed bankfull imminently, and that flooding of areas adjacent to the rivers affected will result.
