Flood Watch – Kingcome River

Issued: 1:00 PM September 29, 2025

The River Forecast Centre is **issuing** a Flood Watch for:

- Kingcome River

Weather Synopsis:

A period of wet weather over the weekend has brought significant rainfall through the central Coast Mountains. Cumulative precipitation since Friday in the 80-160 mm range has been observed through the region. Additional rainfall, in the order of 10-40 mm over the next few days is currently forecasted in weather modelling for the region.

River Conditions:

River levels have remained high since the weekend. The hydrometric station at Kingcome River below Atlatzi River (Water Survey of Canada gauge 08GF009) is not currently reporting data. As a result, nearby supplemental stations on the Kingcome River are being used to monitor conditions and extra caution is being applied. Flows are expected to peak today before falling into Tuesday.

The [River Forecast Centre](#) continues to monitor the conditions and will provide updates as conditions warrant.

Ministry of Water, Land and Resource Stewardship

A **High Streamflow Advisory** means that river levels are rising or expected to rise rapidly, but that no major flooding is expected. Fast-flowing bodies of water increase risk to life safety. Minor flooding in low-lying areas is possible.

A **Flood Watch** means that river levels are rising and will approach or may exceed bankfull. Flooding of areas adjacent to affected rivers may occur.

A **Flood Warning** means that river levels have exceeded bankfull or will exceed bankfull imminently, and that flooding of areas adjacent to the rivers affected will result.
