- North Coast including tributaries and smaller streams around Stewart, Gitlaxt'aamiks (New Aiyansh), Terrace, Prince Rupert, Kitimat, and other coastal communities

The River Forecast Centre is **ending** a **High Streamflow Advisory** for:

- North Coast including tributaries and smaller streams around Stewart, Gitlaxt'aamiks (New Aiyansh), Terrace, Prince Rupert, Kitimat, and other coastal communities
- Haida Gwaii

Weather Synopsis:

Rainfall rates have eased through the area. Total rainfall amounts of 85 to 100 mm was observed across the region over since Saturday.

River Conditions:

Rivers have reached peak levels from this event and are now receding. Flows are currently below levels of flood concern.

The [River Forecast Centre](#) continues to monitor the conditions and will provide updates as conditions warrant.

For information on how to prepare for flood hazards, visit [PreparedBC](#).

BC River Forecast Centre

Ministry of Water, Land and Resource Stewardship

A **High Streamflow Advisory** means that river levels are rising or expected to rise rapidly, but that no major flooding is expected. Fast-flowing bodies of water increase risk to life safety. Minor flooding in low-lying areas is possible.

A **Flood Watch** means that river levels are rising and will approach or may exceed bankfull. Flooding of areas adjacent to affected rivers may occur.

A **Flood Warning** means that river levels have exceeded bankfull or will exceed bankfull imminently, and that flooding of areas adjacent to the rivers affected will result.
