ENDED - Flood Watch – Upper Fraser River

ISSUED: 11:00 AM July 5, 2021

The River Forecast Centre is **ending** the **Flood Watch** for the **Upper Fraser River** including:

- **Upper Fraser River including the Robson Valley and areas from Sinclair Mills upstream to Torpy, Dome Creek, Dore River, McBride and surrounding tributaries**

With easing temperatures and decreased snowmelt rates, rivers have reached their peak levels and are now receding. Flows are now below 2-year return period flows along the mainstem of the Fraser River through the Robson Valley and surrounding tributaries. Continued recession of river flow is expected today and into next week.

The [River Forecast Centre](#) continues to monitor the conditions and will provide updates as conditions warrant.

BC River Forecast Centre

Ministry of Forests, Lands, Natural Resource Operations and Rural Development

A **High Streamflow Advisory** means that river levels are rising or expected to rise rapidly, but that no major flooding is expected. Minor flooding in low-lying areas is possible.

A **Flood Watch** means that river levels are rising and will approach or may exceed bankfull. Flooding of areas adjacent to affected rivers may occur.

A **Flood Warning** means that river levels have exceeded bankfull or will exceed bankfull imminently, and that flooding of areas adjacent to the rivers affected will result.
