ENDED - High Streamflow Advisory – South Coast, Lillooet River, Fraser Valley

Issued: 8:45 AM November 14, 2025

The River Forecast Centre is **ending** a **High Streamflow Advisory** for:

- South Coast including rivers and tributaries around Howe Sound, Sunshine Coast, Sea-to-Sky and North Shore Mountains
- Lower Fraser Tributaries including the Lillooet River and tributaries around Pemberton and tributaries around the Fraser Valley

Weather Synopsis:

Rainfall rates have eased through the area. Total rainfall amounts of 40 to 95 mm was observed across the region since Wednesday. Rainfall rates have now eased. Additional rainfall is expected over the weekend as the next storm cycle works across the BC coast.

River Conditions:

Rivers have reached peak levels from this event and are now receding. Flows are currently below levels of flood concern.

The [River Forecast Centre](#) continues to monitor the conditions and will provide updates as conditions warrant.

For information on how to prepare for flood hazards, visit [PreparedBC](#).

---

A **High Streamflow Advisory** means that river levels are rising or expected to rise rapidly, but that no major flooding is expected. Fast-flowing bodies of water increase risk to life safety. Minor flooding in low-lying areas is possible.

A **Flood Watch** means that river levels are rising and will approach or may exceed bankfull. Flooding of areas adjacent to affected rivers may occur.

A **Flood Warning** means that river levels have exceeded bankfull or will exceed bankfull imminently, and that flooding of areas adjacent to the rivers affected will result.
