

Ministry of Water, Land and Resource Stewardship

ENDED - High Streamflow Advisory – Coldwater, Central Coast, South Coast, Vancouver Island
Issued: 4:00 PM December 11, 2025

The River Forecast Centre is **ending** a High Streamflow Advisory for:

- Coldwater River
- Central Coast including the Kingcome River, Wannock River and surrounding basins
- South Coast including Howe Sound, North Shore Mountains and Metro Vancouver
- Vancouver Island

Rainfall rates have eased through the region. River levels have reached peak levels and are receding. No significant additional rises are anticipated at this time.

Note, a Flood Warning remains in effect for the Sumas River. [See current warning](#) for details.

The [River Forecast Centre](#) continues to monitor the conditions and will provide updates as conditions warrant.

For information on how to prepare for flood hazards, visit [PreparedBC](#).

BC River Forecast Centre

Ministry of Water, Land and Resource Stewardship

A **High Streamflow Advisory** means that river levels are rising or expected to rise rapidly, but that no major flooding is expected. Fast-flowing bodies of water increase risk to life safety. Minor flooding in low-lying areas is possible.

A **Flood Watch** means that river levels are rising and will approach or may exceed bankfull. Flooding of areas adjacent to affected rivers may occur.

A **Flood Warning** means that river levels have exceeded bankfull or will exceed bankfull imminently, and that flooding of areas adjacent to the rivers affected will result.
