ENDED - High Streamflow Advisory – Somass River

Issued: 09:30 AM February 3, 2026

The River Forecast Centre is **ending** a **High Streamflow Advisory** for:

- Somass River

Weather Synopsis:

Rainfall has now eased across the region, with drier weather anticipated over the week.

River Conditions:

River levels have reached peak levels from recent storm events and are now receding. No significant additional rises are anticipated at this time.

The [River Forecast Centre](#) continues to monitor the conditions and will provide updates as conditions warrant.

For information on how to prepare for flood hazards, visit [PreparedBC](#).

Ministry of Water, Land and Resource Stewardship

A **High Streamflow Advisory** means that river levels are rising or expected to rise rapidly, but that no major flooding is expected. Fast-flowing bodies of water increase risk to life safety. Minor flooding in low-lying areas is possible.

A **Flood Watch** means that river levels are rising and will approach or may exceed bankfull. Flooding of areas adjacent to affected rivers may occur.

A **Flood Warning** means that river levels have exceeded bankfull or will exceed bankfull imminently, and that flooding of areas adjacent to the rivers affected will result.
